

MAKRON

Marine Industry

DRY AND WET WASTE TREATMENT

MARINE INDUSTRY

Your subcontracting partner for industrial automation, engineering and manufacturing in the marine industry.

Makron supports your technology needs as an engineering, automation and manufacturing subcontractor. We have years of experience in offering our automation expertise to a marine technology company working with waste and wastewater treatment systems. For automation systems, we cover your needs completely from planning to programming, to electrical control cabinet manufacturing and commissioning.

DRY AND WET WASTE TREATMENT

Dry and wet waste treatment systems manage mixed or recyclable waste in a way that is safe, environmentally friendly, and energy efficient by reducing its volume through compaction, shredding, and burning. We offer automation as a subcontractor to technology providers. We deliver the conveyors you need. And as your partner, we use automation to complete your dry and wet waste treatment processes.

What Makron does

We cover all automation steps in your technology process and manufacture the electrical control cabinets and systems. We deliver conveyor solutions customized to your needs.

Products & expertise

- Conveyors
- Electrical engineering
- Programming
- Electrical control cabinets
